

IPPON

**DON'T WORRY,
IT'S MADE IN JAPAN.**

Japanese-made quality from Hyogo.

PRODUCT CATALOG

2026

RockLink Rock Link inc.

MADE IN HYOGO, JAPAN. DEPENDABLE BY DESIGN.

IPPON combines the hook-making expertise cultivated in Hyogo with the precision required of terminal tackle. Hook geometry, point finishing, forging, coatings, strength and fitting performance are assessed against clear specifications to deliver consistent Japanese-made quality.

We focus on the geometry and finish of each hook, together with the strength and smooth operation required of terminal tackle, to provide dependable quality from one pack to the next. This catalog presents the current IPPON range in two sections: hooks and accessories.

CRAFTSMANSHIP

Made in Hyogo, Japan.

Built for dependable use.

A hook looks simple. It is not. Wire gauge, point geometry, forging, tempering, and coating — each decision changes how it penetrates, holds, and endures. We inherit the judgment behind each detail from generations of hook-making in the Banshu region, then apply clear specifications and inspection standards to every product.

The same discipline applies to swivels, snaps, rings, and other terminal tackle. Smooth rotation, reliable opening and closing, and consistent operation are qualities that cannot always be judged by sight alone. For us, the value of Japanese manufacturing lies in keeping these hidden defects to a minimum — so a missed flaw does not cost an angler a fish or a seller a customer's trust.

01

A tradition carried into every hook

Our hooks are made in the Banshu region of Hyogo, where fish-hook making has been refined across generations. Wire cutting, forming, forging, and tempering bring that accumulated expertise into every hook.

02

Designed for purpose

Every model starts with a target fish and a fishing method. Wire gauge, point angle, and coating are selected for a reason; no detail is treated as generic.

03

Checked to specification

Wire dimensions, point geometry, finish, strength, and operation are checked against clear specifications so quality remains consistent from one production run to the next.

IPPON hooks are made in the Banshu region of Hyogo. Swivels, snaps, rings, and related terminal tackle are also made in Hyogo, Japan.

NEW PRODUCTS

NEW All-purpose

CHINU Straight Pierce

Straight-point Chinu hook for a quick hookset on contact

1-4 **P.10**

NEW All-purpose

CHINU Light Pierce

Fine-wire, lightweight Chinu hook designed for easy penetration

1-4 **P.10**

NEW All-purpose

GURE

Heavy-wire hook designed for blackfish (girella)

4-7 **P.11**

NEW All-purpose

GURE Lightfine

Fine-wire, lightweight Gure hook for finicky fish and a natural bait descent

4-7 **P.11**

NEW All-purpose

RYUSEN Double Shank Barb

Two shank barbs help prevent worm bait from slipping

NEW Big game

LIGHT MULTI Ring

Lightweight ringed hook for a wide range of applications

18, 19, 20 **P.22**

NEW Assist hooks

WIDE FANG

Wide gape for effective hooksets and secure holding

2/0, 3/0 **P.29**

NEW Assist hooks

LIGHT EDGE

Fine-wire, lightweight hook for light and slow jigging assist rigs

15-18 **P.29**

Check every size at actual scale.

This catalog shows every size of each product at actual size. Lay your own hooks or rigs on the page to compare the sizes directly.

01

Print at 100%

Actual-size figures are true to size when this catalog is printed at 100%. When printing the PDF, choose “Actual size (100%)”. Scaling to fit the paper changes the size.

02

Check the 10 mm reference bar

Measure the 10 mm reference bar beside each actual-size figure with a ruler to confirm the print scale. The scale at the bottom of this page also works as a ruler when printed at 100%.

03

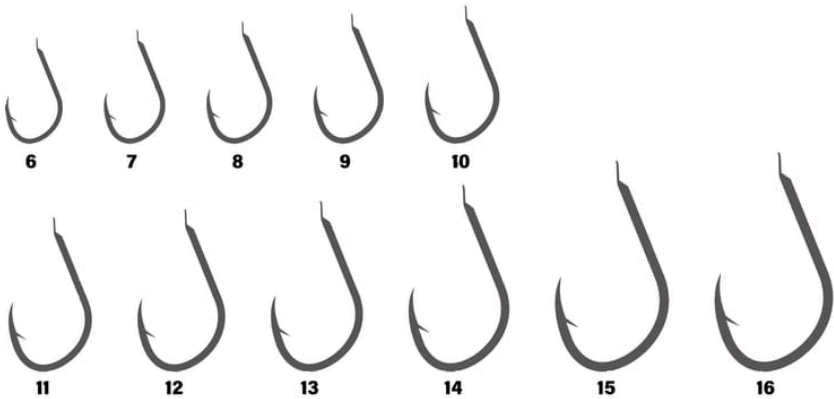

Individual variation

Actual-size figures show the standard size of each product. Individual products vary slightly and may differ a little from the figure.

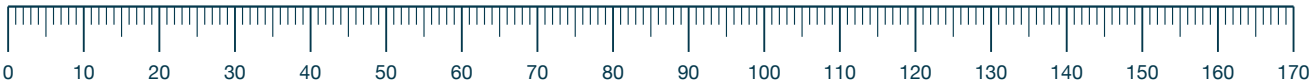

EXAMPLE — ISEAMA

ACTUAL SIZE

10mm

SCALE — WHEN PRINTED AT 100%

CHAPTER 04

HOOKS

Precision fishing hooks forged with the traditional techniques of the Banshu region, Hyogo.

Choose by shape and application

Start with the target fish and fishing method, then compare hook shape, wire diameter and size. Each product is shown with every size at actual size, together with the pack quantity, standard weight, standard wire diameter and JAN code for each size. New products are marked **NEW**.

Actual-size figures are true to size when this catalog is printed at 100%. Use the 10 mm reference bar beside each figure to check the print scale.

CHAPTER 05

ACCESSORIES

Japanese-made swivels, snaps, and rigging parts designed for dependable strength and smooth operation.

Swivels: rig connections

Choose the connection layout for your rig, then compare the listed dimensions and strength. Rolling, ball-bearing and three-way swivels serve different rigging needs.

Snaps and parts: size and strength

Compare the shape, opening or inner diameter, and stated strength with the components you intend to connect. Check the specification table and pack quantity to select the size you need.

IPPON — FOR DISTRIBUTORS / OEM

IPPON wholesale and OEM inquiries

We welcome inquiries about IPPON wholesale distribution and importing, as well as OEM/ODM manufacturing for Japanese-made hooks and terminal tackle. Pricing and lot conditions are provided individually after we review your inquiry.

Your brand. Hyogo craftsmanship.

IPPON OEM projects follow two routes. We can supply existing hooks and terminal tackle in bulk, without retail packaging, for sale in your original packaging. When you need a product designed from the ground up, we review the specifications and development scope through to production. This is a substantially larger project and requires significantly larger production lots.

Existing products

Bulk supply for your original packaging

Original design

Specification, development, and production from the ground up

Manufacturing region

Hooks — Banshu region of Hyogo / Swivels, snaps, rings, and other terminal tackle — Hyogo, Japan

HOW IT WORKS

01 Inquiry

Tell us about your market, sales channels, and the product lines you are interested in.

02 Review and proposal

We review your market, product requirements, quantities, and timing, then propose the appropriate supply or development route.

03 Samples

Evaluate the products in your own hands and in your own waters.

CONTACT

Start the conversation.

Inquiries are accepted through the contact form on our website.

We normally reply within two business days. Inquiries are welcome in English or Japanese. rocklink.co.jp/contact

INDEX

Sizes and pack quantities show the range available. Country of origin: Japan (all products)

Some items may take time to become available. Please confirm delivery timing when you order.
